Installation will require the following tools:

8mm nut driver, 1/4" Socket Wrench, 13mm deep socket, Torx25 Screwdriver

Recommended: Silicone Lubricant

Note: Legal in California for use on race vehicles only. The use of this device on vehicles used on public streets or highways is strictly prohibited in California and others states that have adopted California emission regulations.

#### Refer to Figure A for steps 1-4

- Step 1. Disconnect the smog pump connector 1 from the OE intake housing.
- Step 2. Disconnect the rubber crank case breather tube 2 from the OE intake housing.
- Step 3. Loosen the clamp (3) connecting the OE intake tube to the turbo.
- Step 4. Carefully lift and remove the entire OE intake assembly.
- \*Note: Alternately, the top half of the OE air box can be removed with a Torx 25 screwdriver.

Refer to Figure B for step 5
Step 5. Install the 3 provided rubber grommets 4 on the bottom of the aFe air box as shown.

Page 5

### Refer to Figure C for steps 6-7

Step 6. Install the larger grommet in the aFe tube as shown, followed by the aluminum smog pump fitting (5).

Step 7. Install the 3/16" brass fitting into the tube 6.

#### Refer to Figure D for steps 8-9

- Step 8. Insert the tube into the filter and tighten the clamp at this time.
- Step 9. Then insert the tube & filter both into the housing by pressing while rotating until you feel and/or hear all 6 of the tabs seat themselves into the flange.

#### Refer to Figure E for steps 10-12

- Step 10. Install the provided reducer coupling and smaller clamp (#44) onto the turbo inlet pipe.
- Step 11. Tighten clamp at this time.
- Step 12. Slip the (#48) clamp onto the coupling but do not tighten at this time.

Refer to Figure F for step 13

Step 13. Place the entire intake assembly in the engine as shown and re-attach the rubber breather hose (7).

\*Note: A small amount of lubricant on the brass fitting may help the rubber hose to slip over the brass fitting.

#### Refer to Figure G for steps 14-18

- Step 14. Lower the intake assembly over the 3 OE mounting locations and firmly press down on the air box.
- Step 15. Next rotate the tube down into the coupling over the turbo inlet pipe.
- Step 16. Align tube where it does not touch anything and tighten the (#48) clamp(8).
- Step 17. Connect the smog pump hose to the aluminum fitting(9).
- Step 18. Confirm all connections are secure and clamps tightened. Your installation is now complete.

\*Note: Re-check all connections after approximately 100-200 miles. Place enclosed CARB EO sticker on a clean/smooth surface on or near the intake system. EO identification label is required in passing the smog check inspection.
