Clutch Disc Installation

Relates to Xtreme kits: KMC23540-1A, KMC23540-1B, KMC23540-1C

With the installation of these Xtreme kits, It is possible to install the clutch disc in either direction. It is important that the bulk of the clutch hub or spring cage faces towards the engine.

Failing to install the clutch disc correctly will prevent the clutch from working efficiently with symptoms of poor, inconsistent or no clutch release.
